

# STACK OVERFLOW SURVEY

Cameron Karpinski

June 17th, 2024

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- Objective of data contextualization and analysis.
- Explanation of the methodology.
- Data collection process.
- Examination and interpretation of data.
- Creation of data visualizations.
- Presentation of results using graphs and identifying trends.
- Discussion on the findings and their broader implications based on the presented results.
- Concluding remarks on the conducted research.

# INTRODUCTION

---

- The results may not evenly represent the entire developer community.
- Participation includes nearly 90,000 developers.
- Highlights trends to forecast future directions in the developer community.
- Provides a global profile of developers.

# METHODOLOGY

---

- Data Collection
- Data Exploring
- Data Wrangling
- Data Visualization
- Presentation

# RESULTS

---

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Top 10 Languages Used

## Next Year

Top 10 Languages Desired Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- Java, HTML, and SQL are the top 3 for now and the future
- Next year, both Python and Typescript will be more desired
- PowerShell becomes less utilized next year

## Implications

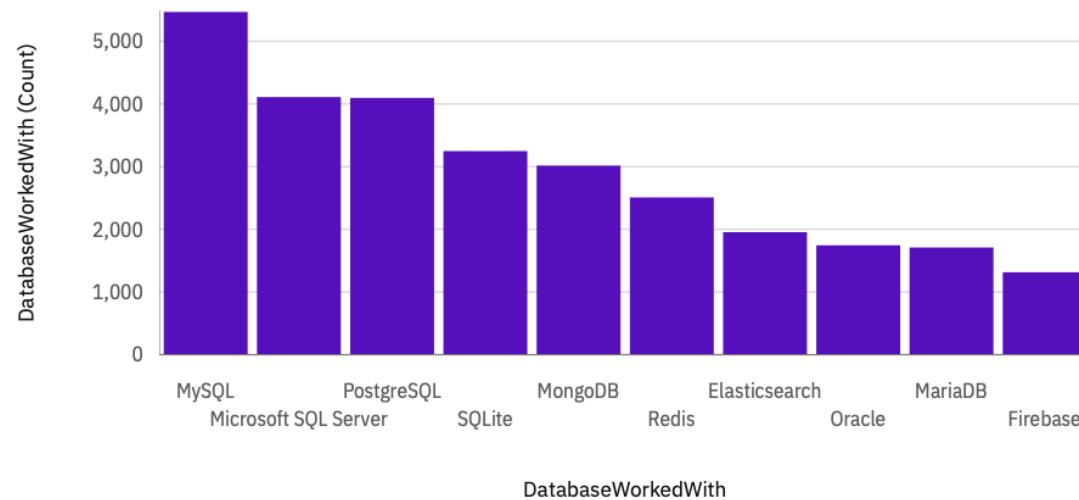

- Web development is very crucial to businesses
- Python is the fastest growing language, due to its simplicity
- There are better options than to use PowerShell in the future

# DATABASE TRENDS

## Current Year

Top 10 Databases Worked With

## Next Year

Top 10 Databases Desired Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL the most widely used
- PostgreSQL and MongoDB are gaining interest next year
- Microsoft SQL Server and SQLite are no longer desired

## Implications

- Open source is still very desirable for companies
- PostgreSQL and MongoDB
  - Establishing good foothold

# DASHBOARD

# CURRENT TECHNOLOGY USAGE

Top 10 Languages Used

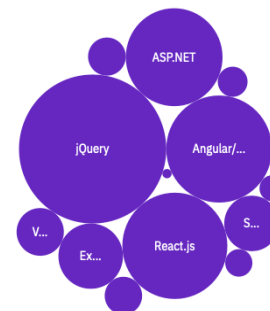

Top 10 Databases Worked With

Top Platforms

Top 10 Web Frames Used

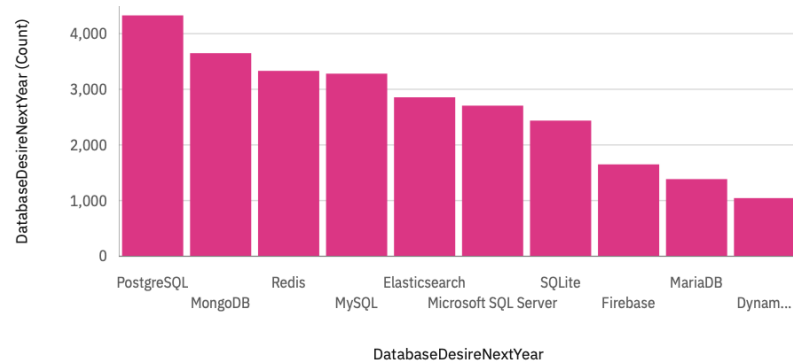

# FUTURE TECHNOLOGY TREND

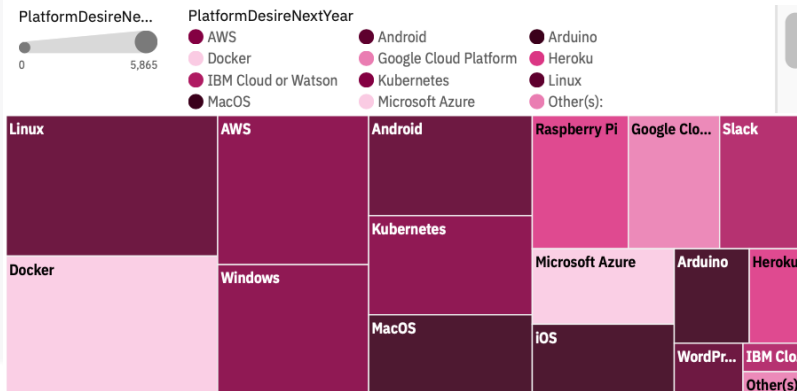

Top 10 Languages Desired Next Year

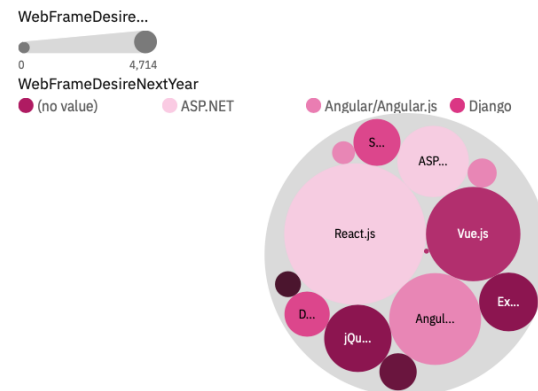

Top 10 Databases Desired Next Year

Top 10 Platforms Desired Next Year

Top 10 Web Frames Desired Next Year

# DEMOGRAPHICS

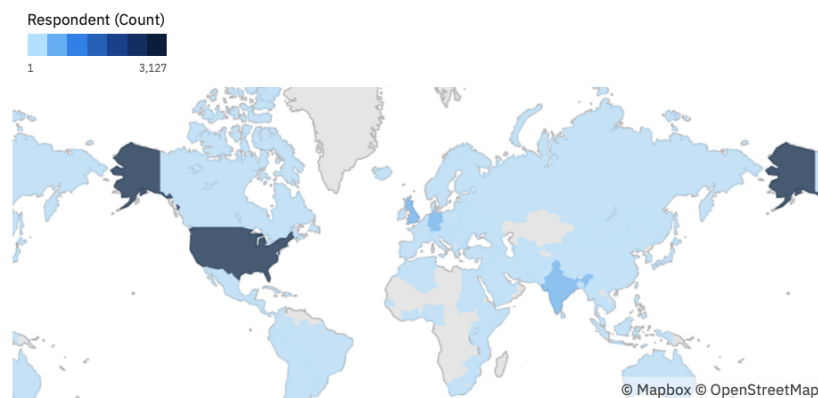

Respondent Classified by Gender

Gender

- Woman;Man;Non-binary, genderq...
- Woman;Man
- Woman;Non-binary, genderqueer,...
- Man;Non-binary, genderqueer, or ...
- Non-binary, genderqueer, or gend...
- (no value)
- Woman
- Man

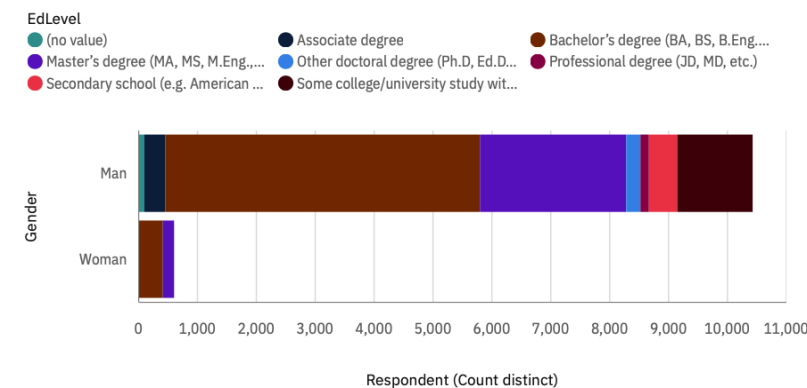

Respondent Count by Country Regions

Respondent by Age

Respondent by Gender

# DISCUSSION

---

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- An overwhelming amount of developers are young males
- Cloud platforms continue to grow rapidly
- Developers mostly located in select countries

## Implications

- Employers must not overlook female developers
- Companies must be agile in implementing cloud technology
- Learning technology must be promoted in more countries

# CONCLUSION

---

- Greater integration and reliance on AI-driven development tools and automated coding.
- Extensive integration of IoT in everyday life, requiring specialized programming skills.
- Need for the programming job market to be less niche

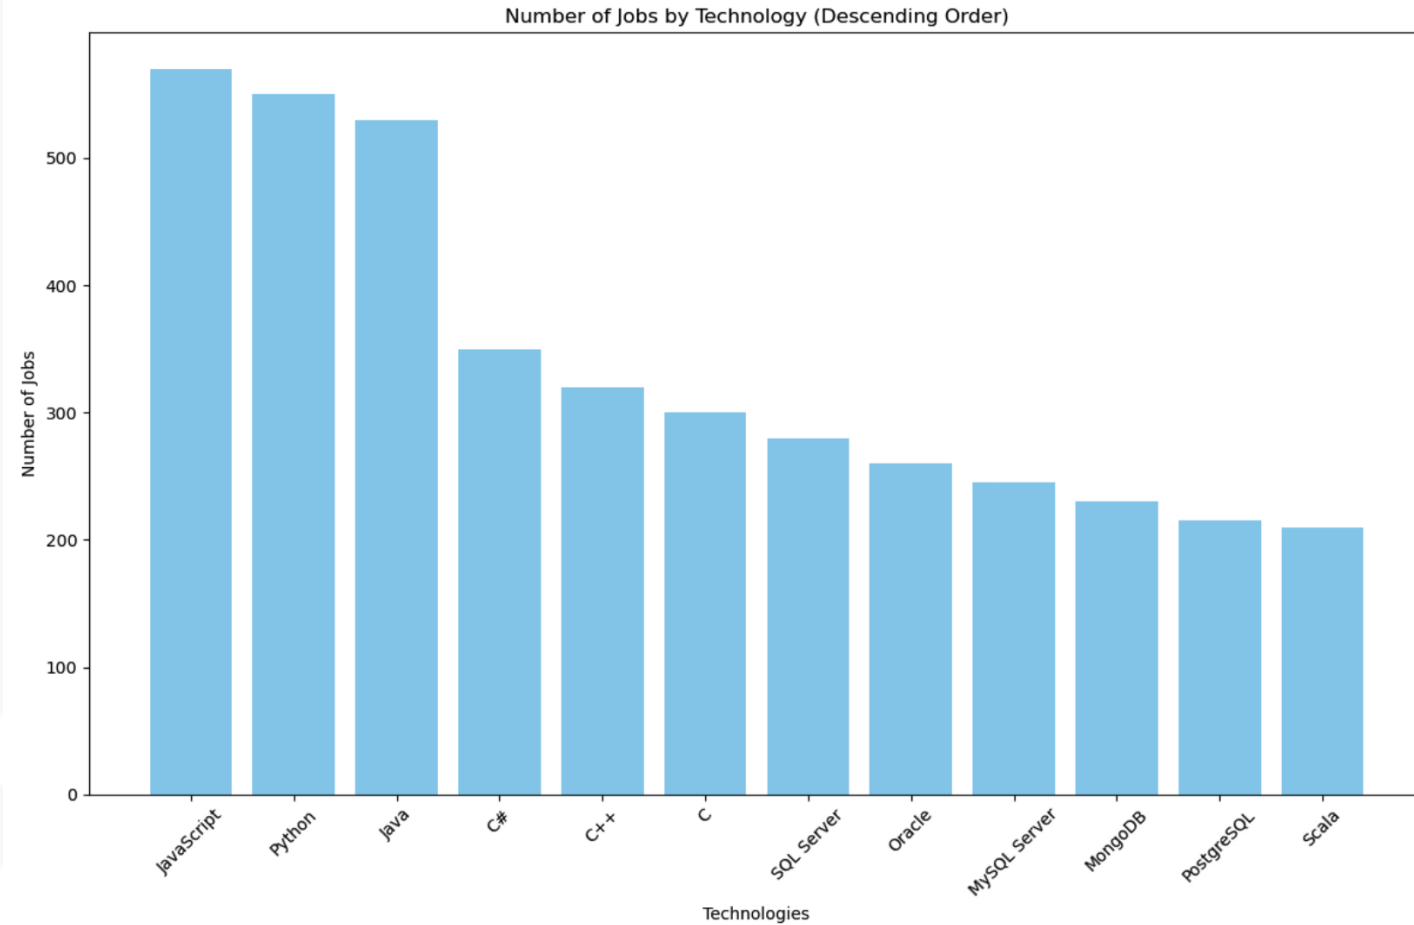

# APPENDIX
